Conversion Rate Overview

The overall conversion rate of **9.6%** across the **3-year period** masks meaningful seasonal swings. September peaks at **12.2%** while October dips to just **6.1%** — a spread of over 6 points that signals significant opportunities for targeted campaigns during soft periods in the 3-year analysis.

Conversion Rate Across the 3-Year Period

Seasonal Patterns

🔥 Peak Periods

Jan (11.3%), Sep (12.2%), Dec (11.4%) — driven by New Year, fall sports, and holiday gifting across the 3-year period

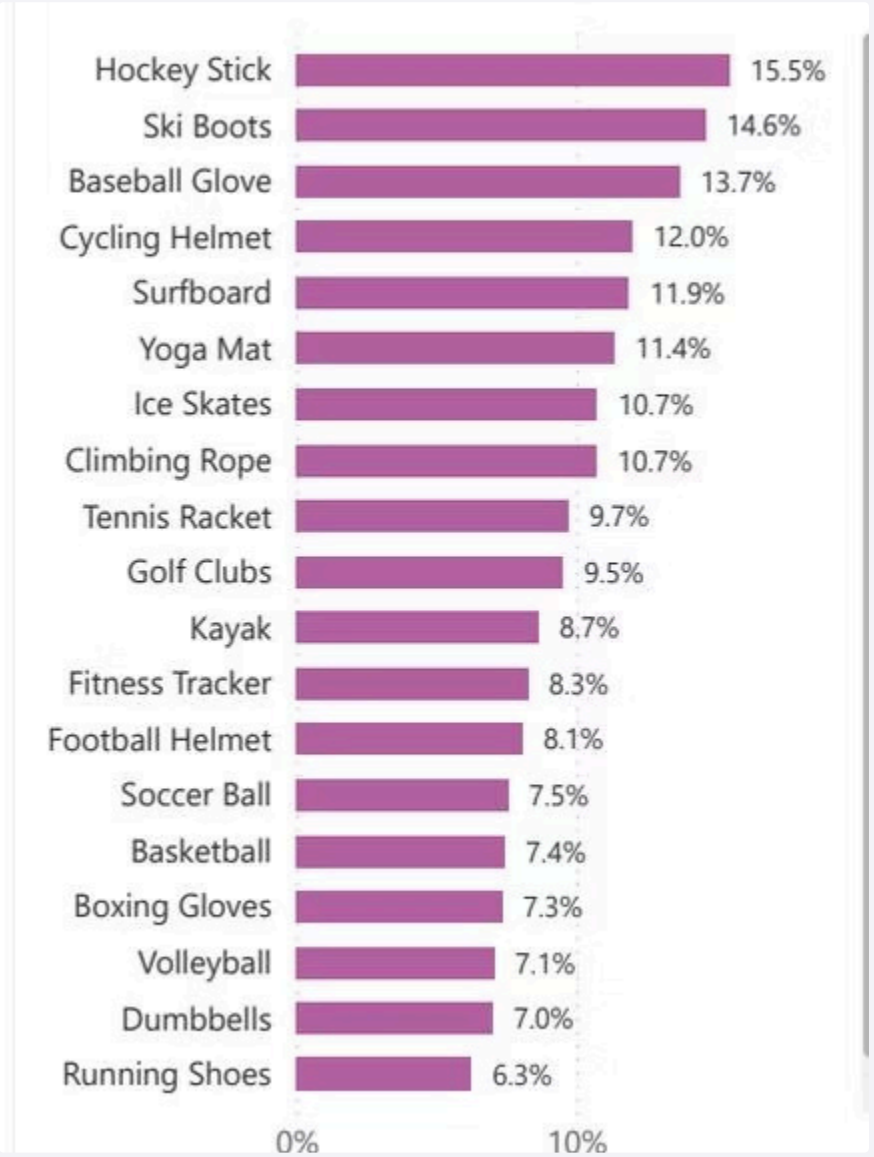
❄️ Soft Periods

Apr (7.7%), May (7.6%), Oct (6.1%) — prime windows for promotional investment across the 3-year analysis

Made with GAMMA

Conversion Rate by Product

Hockey Stick leads all products at **15.5%**, followed by Ski Boots (14.6%) and Baseball Glove (13.7%). Across the 3-year period, Running Shoes (6.3%) and Dumbbells (7.0%) lag the category average — presenting clear optimization targets for product pages and merchandising.



Top 5 Converters

Hockey Stick

15.5% — #1 overall

Ski Boots

Social Media Performance

Reach Is Strong — Engagement Needs Attention

With **90.8M views** across the 3-year period, social reach is robust. However, a click-through rate of ~19.7% and a like rate of only 4.6% suggest content resonates at a surface level but may not be compelling enough to drive deeper interaction. Views trend steadily downward across the 36-month period.

Customer Sentiment

Reviews Skew Positive, But Negatives Are Loud

The average rating of **3.7 / 5.0** is consistent across the **3-year period**. Of 1,363 total reviews, **840 are Positive** — but 226 are outright Negative and 196 are Mixed Negative, meaning roughly **31% of reviewers** left a critical signal worth investigating at the product level.

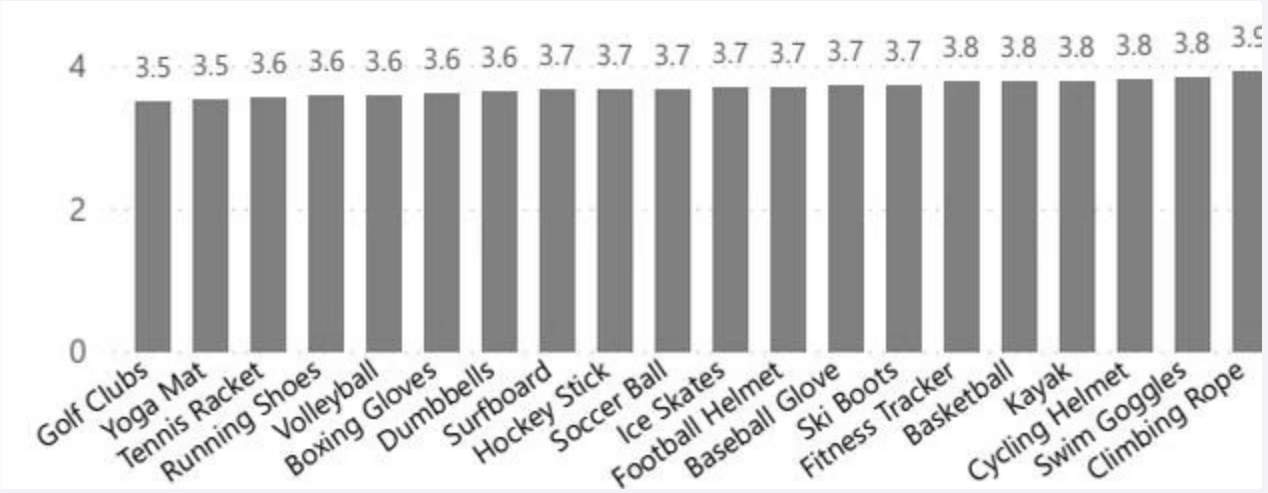
Product Ratings

Ratings Are Tight — Climbing Rope Leads

Product-level ratings range narrowly from **3.5 to 3.9**, suggesting broadly acceptable — but not outstanding — product quality across the catalog. Climbing Rope (3.9) and Swim Goggles (3.8) top the list, while Golf Clubs and Yoga Mat (3.5) sit at the bottom and may benefit from quality improvements or better expectation-setting in product descriptions.



Rating Highlights

⭐ Highest Rated

Climbing Rope (3.9), Swim Goggles, Basketball, Kayak, Cycling Helmet (3.8)

⚠️ Needs Attention

Golf Clubs & Yoga Mat (3.5), plus Tennis Racket, Running Shoes, Volleyball (3.6)

📊 3-Year Rating Trend

Across the 3-year period, averages range 3.5–3.9, with May & July peaking at 3.9

Key Takeaways

What the Data Is Telling Us

🎯 Double Down on Top Converters

Hockey Stick, Ski Boots, and Baseball Glove consistently convert above 13% across the 3-year period. Prioritize inventory, PDP investment, and paid search for these SKUs.

📅 Shore Up Soft-Month Conversion

April, May, and October dip below 8%. Targeted promotions or bundles during these windows could meaningfully lift the 3-year average conversion.

📢 Re-Engage the Social Funnel

Views are declining across the 3-year period. A content refresh — especially video and interactive formats — could reverse the trend and lift click rates.

⭐ Address Negative Reviews Proactively

31% of reviews carry a negative signal. Focus on Golf Clubs, Yoga Mat, and Running Shoes — the lowest-rated products — with improved QA or product descriptions.
